

Pre-Wired Panels

Pre-Wired Panels

The assembly and wiring of panels on a job site creates two major areas of concern:

LABOR - task requires a person with special ability and can be time-consuming.

MATERIALS - ordering and scheduling components requires additional time; think about contactors, relays, sockets, pilot lights, fuses & holders, switches, meters, CT's, transformers, controllers, terminal strips, cabinets, spiral wrap, duct, etc. Some components are not readily available or can only be purchased in large quantities which result in waste. Let our efficient production and warehousing staff work for you.

ACS/Uni-Fab has the facilities, knowledge, and skills to tackle any panel fabrication and wiring project. We are capable of building from your plans and specifications or assisting you in designing a specific panel to meet your needs.
